Professional Synopsis:

Strong knowledge of Information Technology with educational background of business administration as its backbone has contributed to development of my professional career as a skilled, efficient and energetic Manager of modern era. The influence of Information Technology and tools of management leading to the competitive and global environment of business have never been challenging as they are today. To overcome such a challenging situation requires equally the knowledge and skills in the field of ICT (Information and Communication Technology) and management of talent human resource.

My association (1988-2018) with Nepal Rastra Bank enriched me multiple dimension of banking industry. It helped me to have clear understanding on monetary and foreign exchange policies, secure system of payment, regulate, inspect and supervise banking and financial system.

My Association with National Statistical Institute as President(past) and TrustResearch as President(present) has developed capacity to lead the business and social science research projects from Government of Nepal, UNICEF and non-government organization using technology and applied statistics. This position also carries training in cyber security in different tier previously conducted by TrustBiz.

My Association with TrustBiz has mounted my skill and experience consulting on IT enabled projects, securing information assets and critical equipment from wide range of attacks and conducting national and international capacity development programs.

I completed Masters in Business Administration (MBA) with first division. Microsoft recognized me as Microsoft Certified Professional (MCP) in 2000 and Cisco acknowledged me as Cisco Certified Network Professional(CCNP)in 2004. I am having handful experience of MSSQL, MySQL and web and mobile technologies. I am having Windows and Linux Server administration experience. I am conversant with R, SPSS and advance Excelstatistics package
